As many as 10 additional activities will be done in a days time based on groupings, moods, and willingness to participate. The residents will request certain activities and then suggestions are made to them. On any day you will see people engaged in card games, book reading, books on tape, hand spa, walks around campus, discussions, sewing, map reading, and differing demos by volunteers such as gardening. We have table top texture covers that allow for exploring through the sense of touch, word extravaganza, movie nights, bingo, and the list of activities goes on and on.
